Hot day, guess about 30° .

This morning we took Mr Solano Gun,

150 tons of cane a day which gives
about 4% sugar. Had a cocktail
at San Solano. After seeing we took
the 2³⁰ train for Asuncion arriv-

Fine day E. In morning went
to bretes where they dipped the plants.
There are about 30 old cows which
should be taken out & 8 or 10 mach
cows. Decided not to divide Palma
potrero, as I believe cattle do better
in large potreros. Plow up as

much as possible & put in Rhodes
Grass which seems to do well, but
think should be sown alone to get
a better stand. Left Estancia in our
Ford at 3.15 and got to Puerto Zapal-
lar in 40 minutes. Had to wait until
6.15 before steamer arrived from Poca.
Bell & I got a cabin together, 46.75 for
the 2 to Barranqueras. Don't leave
until tomorrow morning. Guess for
Hamilton should go on as before at

June. Steamer seems quite neat.

a bit cloudy towards end of journey.
Left Fornosa by air train & arrived
here at 5 P.M. & stop at Martin's Hotel.
Drove to new town, about a year
old & the biggest place on road.
Did not like the escapes half way
towards Fornosa, as lot of *poasto*
prima, *monte* & *esteros*. The estero
Pirana which gets the pure flow of the
Pilcomayo must be about 2 leagues
broad. Camp on this side seems good
as no *prima* & a chap told me he sends
cattle to Tucuman & gets good prices.

3 Tuesday.

On board Guarany on way to Rosario.

Lots of *pinal* I saw around Pozo del
Tigre & some further on this way.

I got seed of a *pinny* tree without
leaves called Palo Mutaco. Bought
& thick sticks of Palo Laurel *aplom*
as *pasito* on train 5/-

Saw 2 passengers together at my
table. (1 contractor public works I guess
drummer both Espanolas. Some monkeys
were offered for sale but had no time
to get it on way back.
