

Note for sheep.

During the year 1896 use señal of punta de lanza de atras de la oreja izquierda ~~for~~ la otra entera for all the Borago lambs (male)

Borago lambs (embias) use punta de lanza de atras de la oreja derecha. (the stock señal) y muesca de atras de la oreja izquierda. This muesca is to tell the year the lamb was marked in. next year 1897 put the muesca on the front of the ear. and each year change position or number of muesca. there is also a señal of a hole in the left ear. which can be used one year, after the muescas are used up, and another year. the left ear can be left entire. \$.
